

# Kids and

- Our contribution to the Community

**E**arly childhood involvement in art presents compelling evidence connecting students to a wide spectrum of academic and social benefits. These studies document the habits of mind, social competencies and personal dispositions inherent to arts learning. Research has shown that what students learn in the arts may help them to master other subjects, such as reading, math or social studies. Students who participate in arts learning experiences often improve their achievement in other realms of learning and life. We are committed to building our community by helping kids learning art.

Over the years, we have run many art workshops from beginner level to advanced level. Our passion is to utilize our industry experience and artistic skill to encourage the younger generation and prepare them for their future.
